ActiveYards®
FENCING FOR YOUR LIFE™

VINYL FENCING

Silverbell Scallop Shown in White 

Your Favorite Room Isn't a Room, It's a Yard.

You've worked hard to make your house a home - functional, comfortable, a natural expression of your personality. With *ActiveYards*, that feeling doesn't stop at your door. From the strength and beauty of their craftsmanship, to the guarantee of their future, our outdoor living products make your yard an integral part of your home.

ActiveYards™ Ingenuity

OUR ADVANTAGES

SOLARGUARD™
Color that Lasts

You work hard for vibrant landscaping, and your fence shouldn't pale in comparison. Our advanced technology protects it from the sun's harmful rays so the color you choose today will keep a bright, like-new finish for seasons to come.

Even when the sun is at its brightest, your fence should be too. That's why we've created an exclusive color retention technology, SolarGuard, which helps your fence outperform others against the sun's harmful rays.

The secret of SolarGuard is in the unique composition of the fencing material itself. SolarGuard technology is actually infused as the fence is created, helping to protect its color from the inside out. Where standard fencing fades or discolors as a result of sun exposure, you can rest assured that SolarGuard helps your ActiveYards fence retain its original color beautifully for years, guaranteed.

GLIDELock™
Privacy & Strength

Your private outdoor sanctuary should be just that: private. Our unique, patent pending design goes together easily, locking tightly into place without any gaps. And it gives you more than seclusion, too. GlideLock fencing holds up to wind better than traditional fences.

Relax outdoors in total privacy. With GlideLock, your ActiveYards fencing assemblies like traditional pickets but locks together for a tighter fit. In fact, there are no gaps at all. The result is perfectly peaceful seclusion that will last a lifetime.

ActiveYards GlideLock fencing holds up in wind. That's because the tighter fit adds strength to your ActiveYards fence. It resists wind pressure better than traditional tongue and groove pickets so even in a storm, your privacy isn't going anywhere.

Jerith

A Fence to Fit Every Need

There are a wide variety of Jerith fence styles available in three colors and several heights. You can be sure that there will be a Jerith fence to enhance the beauty of your home, pool or yard.

Residential Fence Styles:

- #101 This traditional wrought iron design has its points even across the top.
- #100 Similar to Style #101, but with staggered picket tops.
- #111 This version of Style #101 is built to accept finials on the pickets instead of the standard spear points. (See Page 13 for information about finials.)
- #401 Similar to Style #101 but with a 1 5/8" space between pickets. This fence will keep most pets in your yard. The narrow spacing also makes it difficult for children to obtain a foothold on the fence.
- #202 A classic design with a smooth rail on top rather than points. Our Best Seller!
- #200 Variation of Style #202 which combines the safety of a top rail with traditional spear points below.
- #402 1 5/8" spaced version of Style #202 for those who do not want exposed points on their fence, but want the added security of a narrow space between pickets.
- Lexington This distinguished wrought iron design has elegant curves connecting the pickets. Available with standard points or finials centered in the arch.
- Concord Similar to the Lexington, but with pickets between each arch, as well as inside. Pickets may have either standard points or finials.
- Ovation This two rail fence has a simple design specifically created to meet the pool enclosure code drafted by the U.S. Consumer Product Safety Commission. (See Page 10 for more information about this design and pool code.)

Regency Fence Styles:

(Made with larger components. Rings are available. Details on pages 8 & 9.)

- Buckingham Similar in design to Style #101 except the pickets do not extend below the bottom rail.
- Kensington Similar in design to Style #111 except the pickets do not extend below the bottom rail.
- Windor Similar in design to Style #202 except the pickets do not extend below the bottom rail.

NOTE: 6" high residential fences have four horizontal rails, not three as shown.

Jerith

America's Fencing Choice™

Rest Easy with a Jerith Fence Around Your Pool

Jerith fence is the perfect choice to surround your swimming pool. Its aluminum construction eliminates rust, while its durable FencCoat™ finish withstands the moisture and chemicals found in a pool environment. Most building codes require swimming pools to have self-closing and self-latching gates around them. These safety features are standard on all Jerith walk gates. In addition, our pickets have less than 4" between them, so children cannot squeeze through.

Our Ovation Fence was specifically designed to meet a Swimming Pool Enclosure Code developed by the U.S. Consumer Product Safety Commission (CPSC). This fence has nearly four feet of space between its two horizontal rails. This virtually eliminates the possibility of a small child climbing over this fence. Also, a child-resistant magnetic gate latch is standard on all Ovation gates. This magnetic latch keeps the release mechanism out of a child's reach and has a built-in keylock for added security. It is also available as an option for all other Jerith gate styles.

The chart on the right shows all of the Jerith fence styles and heights that meet the CPSC Pool Code. You will notice that there are a few "Modified" designs that are altered specifically to meet the Pool Code. (These altered styles are shown below.) For 54" high Modified Styles #200 and #202, the only variation from the standard designs is that the pickets do not extend below the bottom rail. Our 57" tall fences combine this same picket change with a narrowing of the gap between the top two rails, which allows our 57" Modified Styles #101, #111, Lexington, and Concord to have at least 45" between the rails as the Pool Code requires.

Be sure to verify the requirements for swimming pool fencing in your area before ordering. There is a Jerith fence to meet nearly every code. Select the one that's right for you!

Style and Height Combinations to Meet Most Pool Codes

Style / Height	48"	54"	57"	60"	72"
Ovation	✓				
Lexington, Concord			✓ (Modified)		✓
101, 111			✓ (Modified)		✓
100					✓
200, 202		✓ (Modified)		✓	✓
401, 402		✓		✓	✓
Buckingham				✓	✓
Kensington				✓	✓
Windsor		✓		✓	✓

These fences meet pool codes that require a fence to be 48" above grade with either:

- (a) any rail spacing and less than 1 1/4" between pickets, or
- (b) one 45" rail spacing between the tops of two adjacent rails and less than 4" between pickets.

Gates will be self-closing and self-latching. Magnetic latches may be required for some gates to meet these codes. Check local building codes for your requirements before ordering.

Jerith

America's Fencing Choice™

Jerith's Exclusive HS-35™ Alloy The Strength of Steel Without the Rust

You no longer have to choose between the maintenance-free ease of aluminum and the strength of steel for your fence. The best of both worlds is available only from Jerith. Through extensive research and testing, Jerith has developed an aluminum alloy called HS-35™. This remarkable material has the strength of steel without the rust!

Our HS-35™ Alloy has a minimum yield strength of 35,000 pounds per square inch (psi), which is significantly higher than the 25,000-33,000 psi strength found in many steel fences. Even more impressive is Jerith's advantage over other aluminum fences, which have yield strengths of only 16,000-25,000 psi.

Every post and rail in Jerith aluminum fences is extruded from our exclusive HS-35™ Alloy. While some aluminum fence manufacturers claim to use similar alloys, they seldom use it in both their posts and rails. In addition, Jerith is the only manufacturer that uses a high strength alloy in its pickets as well. They are over 50% stronger than other aluminum fences. We don't cut corners on the strength of our products!

An independent testing laboratory has proven that a typical Jerith Residential Fence can support over 350 pounds per section without any structural failure and our Regency fence can hold about 500 pounds! With strength like this, Jerith fences will certainly satisfy your fencing needs for years to come.

Always look for our logo on the sections, post caps, and gates to ensure that you are receiving Jerith quality and our exclusive HS-35™ Alloy. Other fences may look like Jerith, but none are as strong, durable or well-built as ours.
